

Overview

Since 1996, the District has invested nearly \$50 million in local organizations through our Community Grants Program. As one of our community benefit programs, we budget and invest a designated portion of our annual tax revenue into the Community Grants Program for the purpose of addressing the health status of residents through partnership. Through these strategic partnerships, we're able to impact the health of thousands of residents each year by expanding access to medical, mental, and dental services, and increasing opportunities for health education and prevention programs.
